

April 2024

Dear valued Customer,

ALA, as a supplier of chemical substances and articles, confirms its duty to comply with the European Community Regulation on chemicals and their safe use (EC 1907/2006) concerning the Registration, Evaluation, Authorization and Restriction of Chemical substances ("REACH Regulation") and is aware that has to provide respective information for only those products, which has been imported and distributed by ALA into or within the European Economic Area (EEA).

With regards to REACH Art. 33 SVHC communication requirements, please note that ALA is not a manufacturer of chemical substances or articles as defined under REACH regulation. The information on substances, mixtures and articles containing any toxic or hazardous ingredient is solely given by the respective manufacturer(s).

ALA currently communicates its REACH Art. 33 obligations to Customers when an Article contains SVHC in a concentration greater than 0.1% weight on weight. This information is automatically generated on the ALA CoC when the manufacturer has provided such information.

According to the REACH Regulation, ALA is not obliged to provide any further information and will not complete customer spreadsheets or any other tools. Instead, if the Customer has a specific list of products ALA supplied, we will provide sufficient information to the Customer.

ALA works closely with its supply chain to ensure a proper communication about the correct SVHC by performing periodical and dedicated survey with their manufacturer base. As a consequence, information regarding the presence of any SVHC may be continuously updated.

Do not hesitate to contact our Central Technical Office at below address should you need any further question.

cto@alacorporation.com

Sincerely

Salvatore Vastano - Global Head of Quality & Compliance
